November 4, 2026

⭐ Enhancements

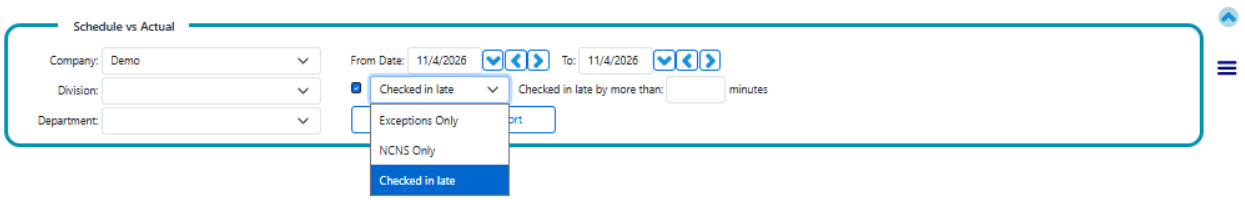

Timesheets – Break Attestation Filter – Break Attestation options have been added to the **Timesheets** filter, allowing users to filter timesheets based on employee break attestations.

Timecard Corrections – Break Attestation – Employees can now include Break Attestation information when submitting **Timecard Corrections** through the web version of the Employee Portal. Administrators can also review the attestation information during the approval process.

Support for Break Attestation within Timecard Corrections in the **Employee and Manager Mobile Apps** is planned for a future release.

Schedule vs. Actual – Additional Filters – New filter options have been added to **Daily Dashboard > Schedule vs. Actual** to identify employees with **No Call No Show (NCNS)** or **Checked in Late** exceptions. When **Checked in Late** is selected, an additional field allows users to filter employees who checked in more than a specified number of minutes late.

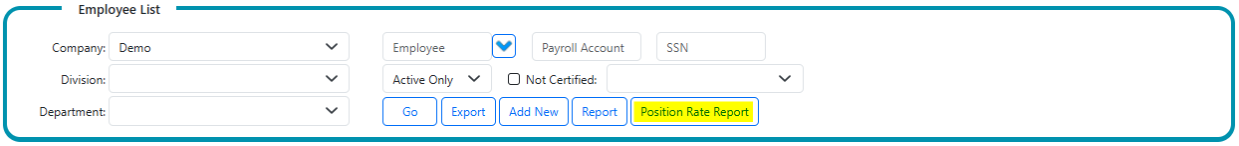

October 22, 2026

🚀 What's New

Position Rate Report – A new report available under Human Resource > Employee List allows administrators to export employee position and rate information, including each employee's primary position and rate, along with any additional positions and rates.

For clients who have not enabled additional position rates, the report will include only each employee's primary position and rate. Access to the report is restricted to users with permission to view employee rates.

October 7, 2026

⭐ Enhancements

Employee Notification History – Employee names are now displayed alongside Employee IDs when viewing filtered results of previously sent employee notifications, making it easier to identify the employee associated with each notification. Results will display in the format **Employee ID - Employee Name** (e.g., **12345 - Jonny Quest**).

Oregon Sick Accrual Rules – **Sick Accrual** is now available as a rule option when creating an accrual rule for Oregon, providing additional flexibility when configuring Oregon sick leave accruals.

September 23, 2026

🚀 What's New

Shift Differential Permissions – New **User Privileges** provide greater control over access to Shift Differentials on employee timecards. Users can be granted **View Only**, **View/Edit**, or **View/Edit/Delete** access, allowing clients to control who can view, add, modify, or delete Shift Differentials.

⭐ Enhancements

Timecard Corrections – Employee Mobile App – Employees can now submit Timecard Corrections directly from the **Employee Mobile App** on both Android and iOS, extending the functionality previously available through the web version of the Employee Portal. Approved corrections automatically update the employee's timesheet. See Timecard Correction Requests on the July 30 release notes.

Break Attestation – Employee Mobile App – Break Attestation is now available in the **Employee Mobile App** on both Android and iOS, extending the functionality previously available through the web version of the Employee Portal. See Rest Break Attestation on the June 17 release notes.

Multi-Company & Payroll Rule Processing – Clients with multiple companies on the same FEIN and/or payroll rules can now **Prepare, Calculate, and Export** payroll for multiple selections at the same time. The **Company** and **Payroll Rule** filters determine which payroll records are included in processing.

Payroll Adjustment Rates – Calculated payroll adjustment amounts now use the rate associated with the employee's applicable **Position Rate** rather than the employee's base rate.

🔧 Fixes & Improvements

Current-Day Schedule Visibility – Employees can now view **other employees scheduled to work with them today** in the Employee Portal and Employee Mobile App, regardless of the client's advance-day requirement for shift trades, drops, and pickups. Eligibility to trade, drop, or pick up a shift continues to honor the client's configured number of days in advance.

Mobile Time Punch Display – The time displayed in **Check In/Out** now refreshes when an employee returns to the Employee Mobile App. This ensures the time shown for the punch reflects the current time, even if the app was previously minimized or left open in the background.

Paid Time Off Across Pay Periods – Paid time off requests that span multiple pay periods are now allocated to the appropriate pay period. When a request includes days at the end of one pay period and the beginning of the next, payroll reflects the applicable PTO hours in each respective period.

July 30, 2026

🚀 What's New

Timecard Correction Requests – Employees can now submit requests to correct their timesheets through the Employee Portal. Once approved, the employee's timesheet is automatically updated to reflect the approved changes. For the initial submission, employees are presented with the current timesheet. Any additional correction requests for the same day will display their previously submitted values, so all times should be reviewed and updated as needed before resubmitting. This feature can be enabled for all departments or selected departments under **Company > Options > Employee Portal**. Support for the Employee Mobile App will be available in a future release.

⭐ Enhancements

Rest Break Attestation – Rest Break Attestation is now available in the **Manager Mobile App**, providing managers with the same functionality previously introduced in the web portal.

🔧 Fixes & Improvements

Duplicate Time Punch Prevention – The Manager Web Portal and Manager Mobile App have been updated to prevent duplicate punches when a manager inadvertently taps multiple times or when device latency delays the initial request.

July 9, 2026

🚀 What's New

Additional Rate Improvements – Employee **Additional Rates** (also referred to as Alternate Rates or Employee Position Rates) now include both **Company** and **Division**. This resolves an issue that prevented additional rates from being assigned correctly to employees who work across multiple companies or divisions.

🔧 Fixes & Improvements

Payroll Export Exclusions – Resolved an issue affecting the **Not Export** option in **Payroll > Payroll**. Employees marked with **Not Export** are now correctly excluded from the payroll export, and the selection remains intact when navigating away from and back to the Payroll screen. As expected, selecting **Calculate** clears all **Not Export** selections since payroll calculations are regenerated at that time.

June 25, 2026

🚀 What's New

Last Punch Display – Employees and managers can now view the employee's most recent punch time when clocking back in from a meal or rest break. This enhancement is available in the **Manager Portal (Web)**, **Manager Mobile App**, and **Employee Mobile App**.

🔧 Fixes & Improvements

Break Return Validation – Improved meal and rest break enforcement within the Employee Mobile App. Employees attempting to clock back in before completing a required meal or rest break are now prevented from doing so and are presented with a message explaining why they cannot return from their break.

June 17, 2026

🚀 **What's New**

Rest Break Attestation – Clients now have the option to enable **Rest Break Attestation**. When enabled, employees who have not recorded a required rest break will be prompted at clock out to attest that they either took their required break(s) or missed their required break(s). The employee's response is recorded in the **Note** field of their timecard. This feature is currently available on the web portal and will be added to the Manager and Employee mobile apps in a future release.

Seattle Rest Break Compliance Updates – Updated Seattle rest break validations to require a rest break for every four hours worked, with the break required to begin by the end of the third hour worked.

June 11, 2026

🚀 **What's New**

Employee Name in Manager App Check In/Out – The employee name is now displayed within the **Check In/Out** feature of the Manager Mobile App, making it easier for managers to confirm they are performing actions for the correct employee.

New York Meal Break Compliance Updates – Updated New York meal break validations to support the state's **Morning/Day**, **Mid-Day**, **Afternoon/Night**, and **Extended Day** meal break requirements.

May 13, 2026

🚀 **What's New**

Employee Certification Upload – Company Support – The employee certification upload process has been updated to include the **Company** field, allowing certification imports for clients with multiple companies. The import template available in the **Training Documents** library has also been updated to include the new company column.

Consistent Block Hour Precision – Block hours displayed on timesheets in both the **Employee Portal** and **Manager Portal** now reflect the same number of decimal places used in the payroll export file for

improved consistency.

🩹 Bug Fixes

Overtime Push Notifications – The Manager App now sends only one push notification per employee when they enter overtime.

New York Second Meal Break Validation – Updated New York compliance validations for second meal breaks. Timesheet validation warnings are now presented when the second meal break is less than 20 minutes or does not begin between 5:00 PM and 7:00 PM.

April 08, 2026

🚀 What's New

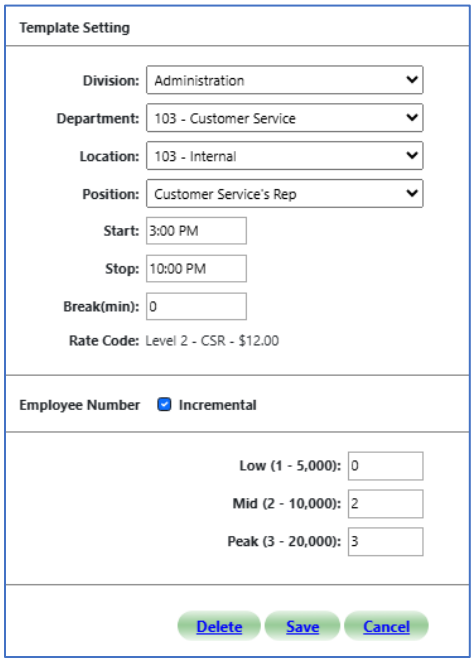

Template Settings – Non-Incremental Staffing Option – A new option has been added to **Template Settings** to support both incremental and non-incremental staffing models. By default, **Incremental** is enabled.

- When **Incremental is checked**, staffing builds as volume increases. Each level adds to the previous level's staffing.
- When **Incremental is unchecked**, each volume level is evaluated independently. The system will only apply the staffing defined for the level that matches the forecasted volume.

This allows for more flexible scheduling. For example, you can create:

- A **single full-day shift (10:00 AM – 10:00 PM)** for lower volume levels, and
- **Split shifts (10:00 AM – 3:00 PM and 3:00 PM – 10:00 PM)** for higher volume levels

When the forecasted volume exceeds the lower threshold, the system will **replace the full-day shift with the split shifts**, instead of adding to it.

March 18, 2026

🔧 Bug Fixes

Paycor Termination Processing – Improved termination processing logic for Paycor integrations by using employee **name and date of birth** instead of employee ID in specific scenarios, ensuring accurate matching.

California 7th Day Overtime Correction – Resolved an issue where overtime was incorrectly applied for California 7th Day Overtime when using a **semi-monthly payroll cycle**.

March 4, 2026

🚀 What's New

Paycor Integration Platform Update – Employee data feeds between Paycor and Optim8 have been updated to utilize Paycor's new integration platform. Their previous platform is being sunsetted, and this update ensures continued synchronization of employee data.

Washington 6th/7th Day OT Validation – Validation warnings have been added to both the Schedule and Timesheets to account for Washington 6th/7th Day Overtime. These warnings appear only when the WA 6th/7th Day OT setting is enabled within the applicable Payroll Rule. As with all schedule validations, calculations account for actual time worked within the same pay period.

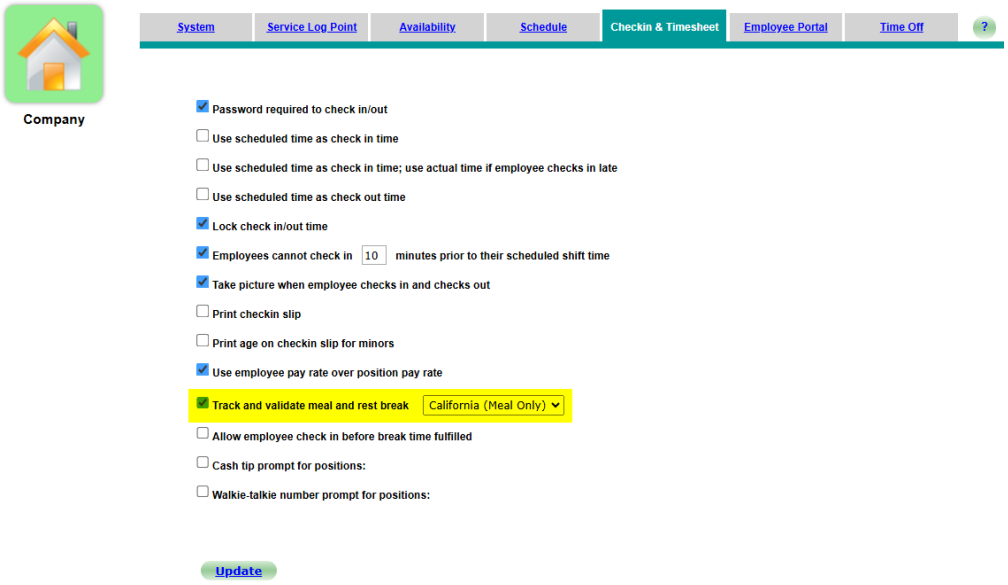

🔧 Bug Fixes

General performance improvements and minor defect corrections have been applied.

February 4, 2026

🚀 What's New

California (Meal Only) Break Tracking Option – A new option labeled "California (Meal Only)" has been added to Company > Options > Checkin & Timesheet > Track and validate meal and rest break. When selected, the system validates missed meal breaks. Missed rest breaks are excluded from validation.

Expanded Timesheet Validation Warnings – Timesheet validation warnings now include California 7th Day Overtime.

Expanded Schedule Validation Warnings – Schedule validation warnings now include Daily Overtime, Daily and Weekly Double Time, and California 7th Day Overtime.

California Meal Waivers – For California employees, meal waivers can now be configured directly on the employee record under Employee Detail > Misc. Available options include Waiver – First Meal Break and Waiver – Second Meal Break.

Summary Chart (Meal Breaks)		
Hours Worked in a Day	Meal Breaks Required	Waivable?
≤ 5 hours	None	—
> 5 to ≤ 6 hours	1 × 30 min	Yes (mutual)
> 6 to ≤ 10 hours	1 × 30 min	No
> 10 to ≤ 12 hours	2 × 30 min	Second yes if first not waived
> 12 hours	2 × 30 min	No waiver for second

Employee Deletion Restrictions – Deleting an employee record is now restricted when historical data exists for timesheets or schedules. When applicable, the following message is displayed:

Deletion Restricted
This record contains history and cannot be deleted. Please terminate the employee in your HCM. If that is not possible, deactivate them in Optim8 by adding a termination date to their job record.

🩹 Bug Fixes

Resolved an issue where the **Export** button in the **Activity Log** (Tools menu) did not generate an Excel file. Exports now correctly download to the user's Downloads folder.

January 7, 2026

🚀 What's New

Payroll Calculation Enforcement – To ensure payroll accuracy, payroll export is now disabled until the Calculate step is completed. If changes are made to timesheets, employee pay rates, or payroll-impacting system settings, payroll must be recalculated before exporting.

HCM Integration Name Handling – For HCM integrations that do not provide a nickname or preferred name, Optim8 will no longer overwrite names that have been manually entered in an employee's profile.

🔧 Bug Fixes

Resolved an issue during **New Year setup** where **Copy to Calendar** only functioned when Division and Department filters were left blank. The process now works correctly when running all departments at once or when running a single department individually.

November 19, 2025

🚀 What's New

Help Guides Refresh – Added new and updated existing Help Guides throughout the system. Many modules include a **question mark icon** in the filter section that provides helpful information about that specific page.

Optim8 Landing Page Redesign – The Optim8 public landing page, where managers or employees sign in, now features an entirely new look. The redesign includes a **Support dropdown** next to the Optim8 logo in the navigation bar and again in the footer. Employees are directed to contact their management team, while clients are redirected to the **Optim8 Jira Portal** to submit ideas or report issues.

Optim8 Manager Portal Mobile App Updates
Managers can now **remove the Out Time** from an employee's timesheet directly within the mobile app. A new **Transfer** option has also been added. When transferring an employee, the system will automatically record the **Out Time for the shift the employee is being transferred out of**, using the start time of the shift the employee is being transferred into.

🔧 Bug Fixes

Resolved an issue where the **hamburger menu** was unresponsive on some pages of the Optim8 application.

October 29, 2025

🚀 What's New

Shift Length on Mobile – Shift length is now displayed in the schedule view of the Manager Portal mobile app.

Timesheet Edit Restriction – Managers can no longer add or edit their own timesheets in the mobile app when their employee ID is linked to their user account.

Utah Meal & Break Tracking – Added configuration and validation options for meal and rest breaks in the state of Utah.

October 1, 2025

🚀 What's New

Secondary Schedule Confirmation
Added a secondary confirmation when selecting Create or Create Blank if at least one shift has already been posted. Users must enter "PROCEED" to confirm, helping prevent posted schedules from being overwritten. This confirmation does not appear when the filtered schedule contains no posted shifts.

Shift Length is now displayed in the schedule. The length calculation takes into account templated breaks.

Transfer on Timesheet
A new Transfer option has been added to Timesheets. When used, the system automatically records a Time Out for the employee's current shift at the transfer time.

🩹 Bug Fixes

- The Illinois Paid Leave Time rule has been updated so that manager-recorded entries can override the minimum 4-hour requirement.
- Users with read-only access to the Budget Department Calendar can now open it without receiving a server error.
- The Payroll column header bar no longer obscures part of the Tip Import message box.

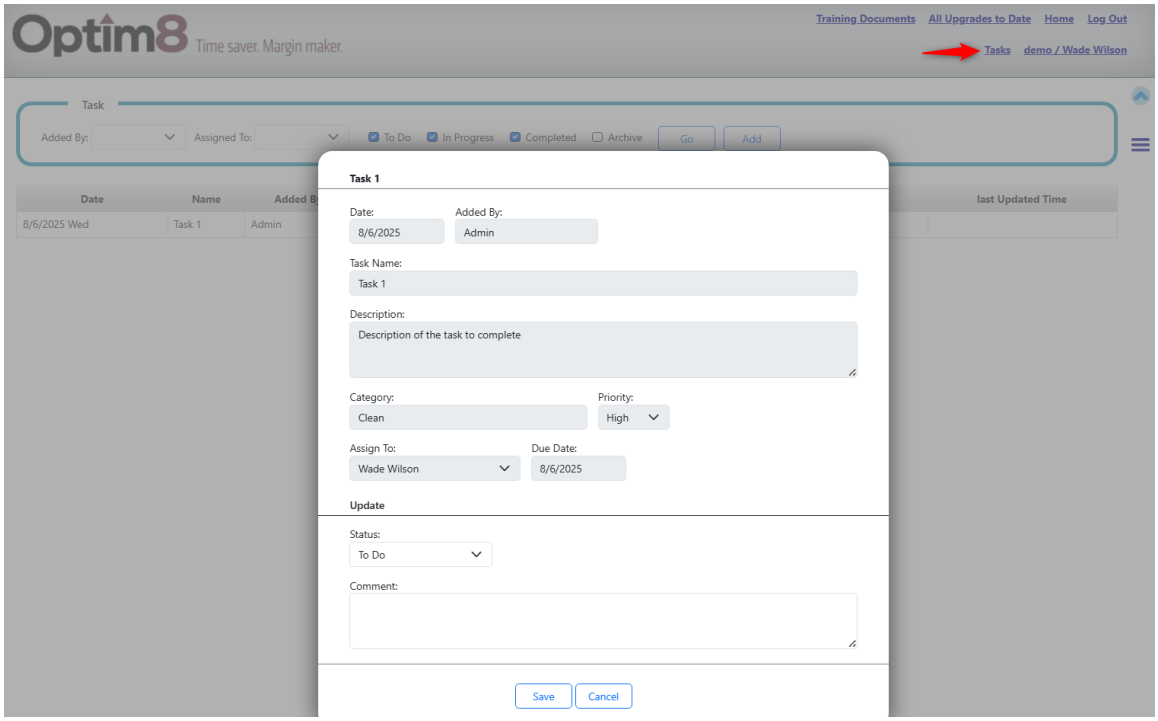

August 6, 2025

🚀 What's New

Massachusetts Break Tracking
Added a new option: **MA (30-MIN Buffer)** to help track and validate meal/rest breaks.

Task Management
You can now **create and assign tasks** to users (Admin, Manager, etc.).

- Users with the "Users" privilege can create, assign, and edit.
- Others can view, update status, and comment on their assigned tasks.
  📎 *Access the Task List from the upper right corner.*

⭐ Improvements

Shift Notes Enhancements

- Notes can now be added for past, current, and future days.
- The home screen shows notes for yesterday, today, and tomorrow.
- Requires the **Shift Notes** privilege.
  (Used by "Manager of the Day" for venue-wide notes.)

🔧 Bug Fixes

- Total hours now display correctly in **Schedule by Employee**.

- **Transfer** in Check In/Out module now functions as expected.

June 25, 2025

🚀 **What's New**

- An option has been added to track and validate meal and rest breaks in New Hampshire.

🌟 **Improvements**

- The “Schedule by Employee” view now contains a “Validate” button, which includes all the same validations as the other schedule views, including pending time off requests.
- Users with edit access to timesheets can remove the clock-out time.
- The Training Documents page now has a role-based filter to support personalized learning journeys. This is the first step; next, we’ll define roles and assign training videos in a specific order to guide users through structured learning paths.
- Changing a reason linked to a Service Log entry automatically updates the associated points.
- **Enhanced Attendance Infraction Handling**
    - We’ve enhanced the employee attendance tracking process by introducing configurable handling options for attendance infractions.
    - Admins can now define how each infraction type is processed:
        - Manual – Entries must be added by a user
        - Semi-Automated – System adds entries in a pending status (not visible to employees, no points counted)
        - Fully Automated – System adds entries in an accepted status, immediately impacting point totals
    - Additional features include:
        - 3 AM (Central) daily processing of automated entries
        - For “Late” infractions, define thresholds (e.g., under 5 minutes vs. 5+ minutes) to assign appropriate reasons and points automatically
    - These settings can be configured in “Tools > Reason & Point,” providing you with greater control over how attendance is tracked and enforced. You can customize them to match your policies. The video “Tools – Reason and Point.mp4” in Training Documents has been updated to reflect these changes. You can also access through this link. http://www.optim8.com/em/util/getv?id=104

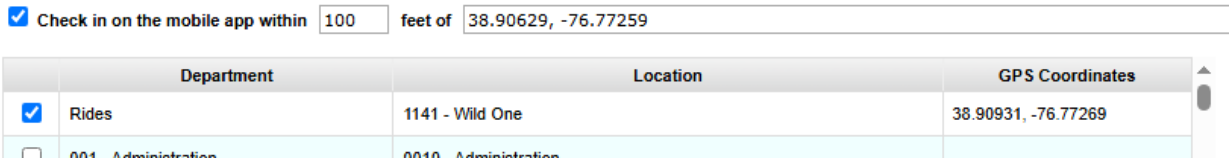

🔧 Bug Fixes

- The timesheet records in the employee portal no longer display HTML code when an ampersand exists in the position.
- The device (web, iOS, Android) used to access the Employee Portal log displays correctly in the Human Resource > Employee Portal Log.
- Active locations only exist in the Geo-fencing setup.

May 21, 2025

🚀 What's New

- 📍 **Smarter Geo-fencing**
  Now aligned with your company's org structure. Enable it under:
  Company > Options > Employee Portal
  - Assign coordinates per location
  - Set check-in distance
  - Default fallback if no coordinates are assigned

- **Illinois Paid Leave Accruals**
  A new configuration option is available to comply with state rules.

🔧 Bug Fixes

- Location dropdown in Template Settings now respects department filters
- Shift differentials now correctly apply extra pay when Extra Amount is selected (no more zeros!)

April 30, 2025

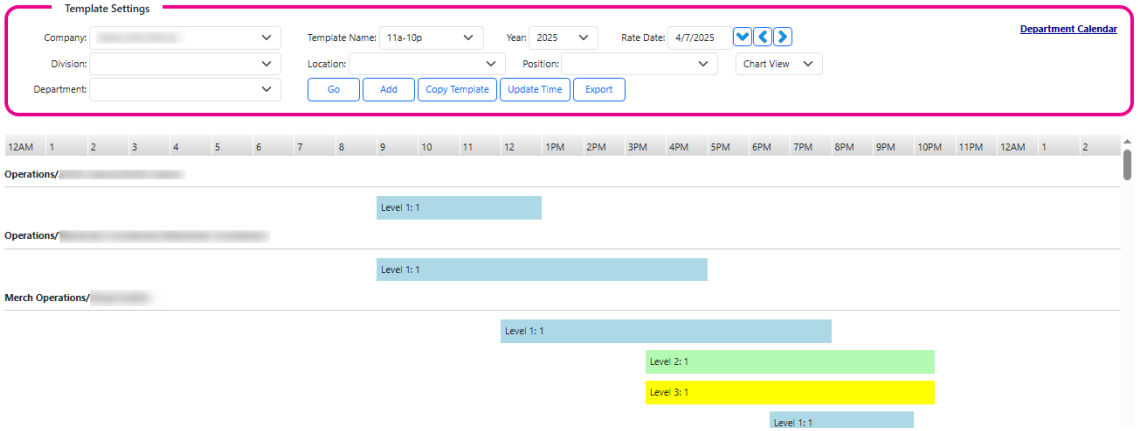

🔧 Bug Fixes

- When adding a new shift in Template Settings, the location dropdown shows a list of locations for the selected department.
- The points shown in the Employee List reflect the correct value based on the reset date.

April 9, 2025

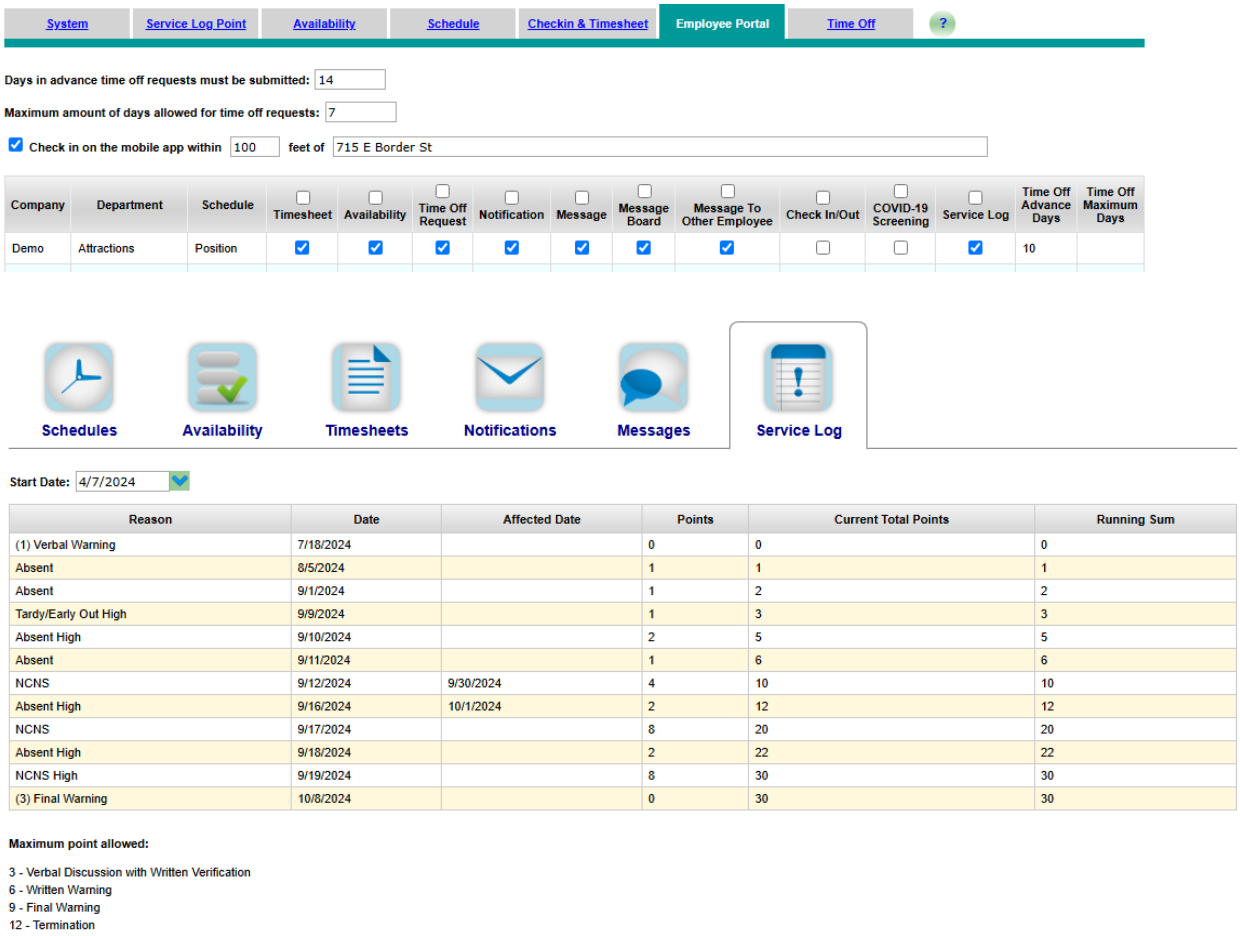

🚀 What's New

- An accrual option has been added to allow employees to accrue paid time off at 0.01923 hours per hour worked. The accrued time off will increment when whole hours have been completed.
- The Employee Portal Log now displays records showing when employees reset their employee portal passwords.
- Users now can view and export template settings in a Gantt chart view.

- Clients can now allow employees to see their service log in their employee portal. To turn this feature on, navigate to “Company > Options > Employee Portal” and select

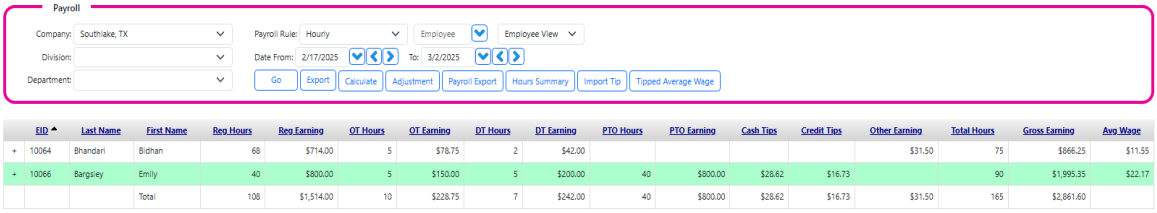

Service Log for all or select departments. The service log start date defaults to the point reset date. The employee can change the date to see previous records. The service log also shows the max points and descriptions.
Note: This option will be available on the mobile app after Apple and Android approve the new version's release.

⭐ Improvements

- For clients who don't need to prep for the upcoming year one department at a time, the Copy & Copy to Calendar options in the Budget Department Calendar no longer require the user to select a department first. Leaving the filters set with only the Company allows all departments to be copied simultaneously. This process will take time, but will work in the background to enable the user to perform other functions.

- The “Employee View” option in Payroll now contains a Totals row for all hours and earnings.

	EID	Last Name	First Name	Reg Hours	Reg Earning	OT Hours	OT Earning	DT Hours	DT Earning	PTO Hours	PTO Earning	Cash Tips	Credit Tips	Other Earning	Total Hours	Gross Earning	Avg Wage
+	10064	Bhandari	Bidhan	68	$714.00	5	$78.75	2	$42.00					$31.50	75	$866.25	$11.55
+	10066	Bargsley	Emily	40	$800.00	5	$150.00	5	$200.00	40	$800.00	$28.62	$16.73		90	$1,995.35	$22.17
			Total	108	$1,514.00	10	$228.75	7	$242.00	40	$800.00	$28.62	$16.73	$31.50	165	$2,861.60	

- Pending time off now displays in the schedule date, chart, and shift views.

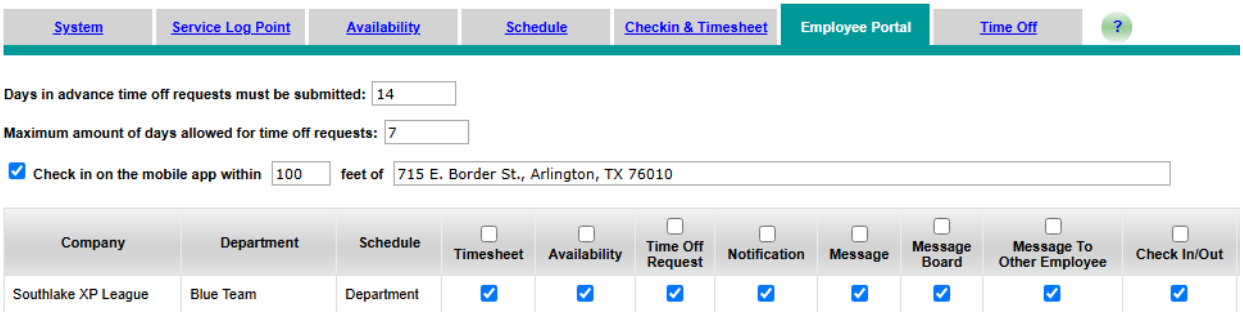

🔧 Bug Fixes

- The company filter in the Corporate Daily Dashboard provided no functionality, so it was removed.
- The responsiveness of the payroll screen was enhanced to ensure that the columns are correctly aligned on smaller screens.
- Checking the “To Be Sent Only” box in the Email Notice screen now displays emails that need to be sent or No Records to Display instead of returning the user to the schedule screen.
- The manager app now displays both shifts when viewing shift trades.
- The Estimated Spending column has been returned to the Daily Dashboard.

March 12, 2025

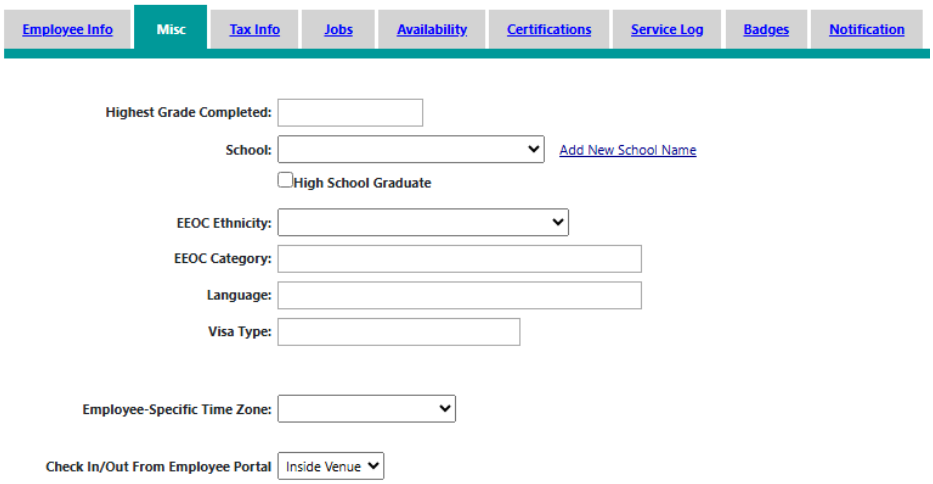

🚀 What's New

- An option has been introduced to monitor and verify meal breaks in Virginia.
- Clients can now allow team members to perform clock functions on their devices while ensuring they are within [x] feet of their park or exhibit. This feature can be enabled in the “Company > Options > Employee Portal” tab by selecting the checkbox, entering the number of feet, the address or GPS coordinates, and choosing the Check In/Out option for each relevant department.

Note:

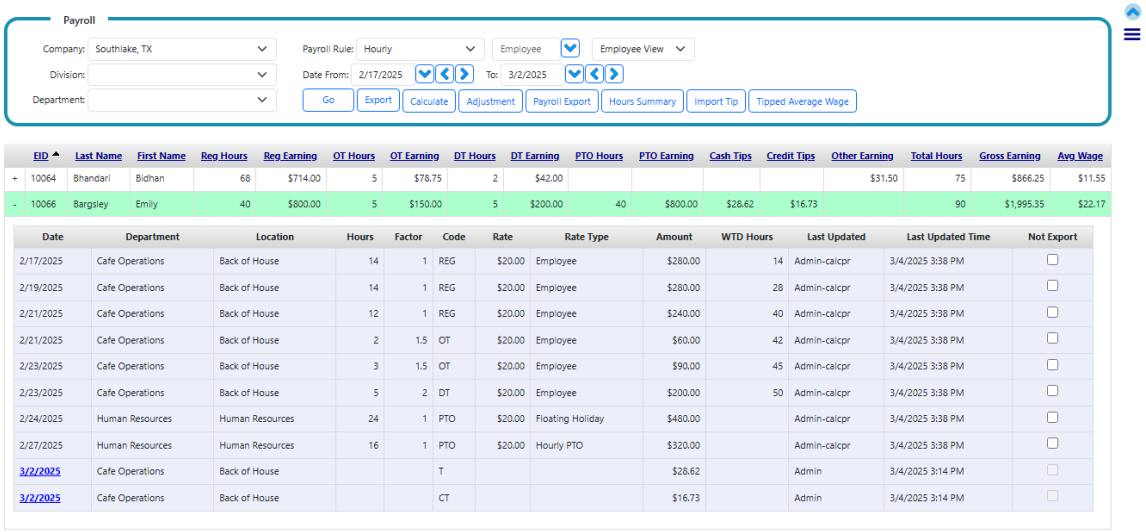

- When the Check in on the mobile app feature is enabled, team members can no longer perform clock functions on the web-based employee portal.
- This option can be overridden for specific employees by selecting “Inside Venue” on the “Misc” tab of the employee details.

- Selecting “Yes” on the “Misc” tab in the employee details allows a team member to use their mobile app or the web-based employee portal to perform clock functions.

- A new “Employee View” has been added to the payroll screen. This view offers a summary of hours and earnings for each employee, along with an option to expand for more details. By default, this page will open to “Date View," but users can set their preferred view in their

preferences.

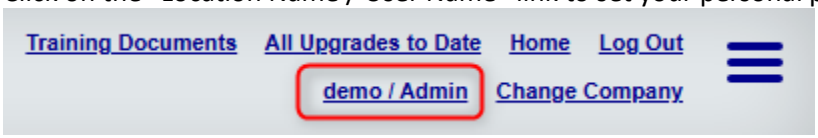

EID	Last Name	First Name	Reg Hours	Reg Earning	OT Hours	OT Earning	DT Hours	DT Earning	PTO Hours	PTO Earning	Cash Tips	Credit Tips	Other Earning	Total Hours	Gross Earning	Avg Wage
+ 10064	Bhandari	Bidhan	68	$714.00	5	$78.75	2	$42.00					$31.50	75	$866.25	$11.55
- 10066	Bargsley	Emily	40	$800.00	5	$150.00	5	$200.00	40	$800.00	$28.62	$16.73		90	$1,995.35	$22.17

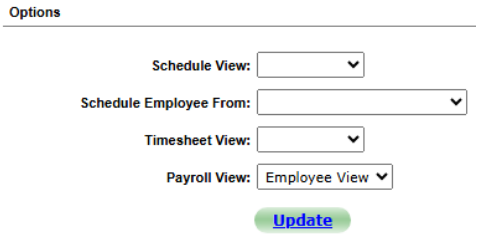

Date	Department	Location	Hours	Factor	Code	Rate	Rate Type	Amount	WTD Hours	Last Updated	Last Updated Time	Not Export
2/17/2025	Cafe Operations	Back of House	14	1	REG	$20.00	Employee	$280.00	14	Admin-calcpr	3/4/2025 3:38 PM	
2/19/2025	Cafe Operations	Back of House	14	1	REG	$20.00	Employee	$280.00	28	Admin-calcpr	3/4/2025 3:38 PM	
2/21/2025	Cafe Operations	Back of House	12	1	REG	$20.00	Employee	$240.00	40	Admin-calcpr	3/4/2025 3:38 PM

2/27/2025	Human Resources	Human Resources	16	1	PTO	$20.00	Hourly PTO	$320.00		Admin-calcpr	3/4/2025 3:38 PM	
3/2/2025	Cafe Operations	Back of House			T			$28.62		Admin	3/4/2025 3:14 PM	
3/2/2025	Cafe Operations	Back of House			CT			$16.73		Admin	3/4/2025 3:14 PM	

- Managers can now select their default view for both Timesheets and Payroll.

  Click on the “Location Name / User Name” link to set your personal preferences.

  Scroll down to the Options section at the bottom of the screen.

⭐ Improvements

- The payroll screen has been modernized with updated controls, appearance, and layout.
- Two new total rows have been added to the Availability > Available Number report, highlighting the number of team members required by the hour based on template settings and the remaining need if the required number exceeds the available number. Note: The available and required totals reflect only those available for or template for the entire hour (i.e., availability that begins at 9:30 will only be reflected in the 10:00 hour).

🔧 Bug Fixes

- The “Availability Date Range Required” warning incorrectly showed when a period's start date immediately followed the previous period's end date.

- Some team members didn't see the posted schedule because it was released one day at a time rather than for the entire week. Note: A team member must have been scheduled within the last 10 days of the department that is being posted.
- The "First Year-Hired Before" values were not shown beyond the first rule in the Vacation and Holiday sections of the Accrual Rules.
- The "Not Certified" dropdown option in the employee list did not display certifications to select.

February 12, 2025

⭐ Improvements

- Alternating row colors have been added to the Schedule page to enhance visual accessibility.
- The "Tip Import" process in payroll has been updated to accept both CSV and XLSX formats.

February 5, 2025

🚀 What's New

- An option has been added to track and validate meal and rest breaks in Rhode Island.
- A search feature has been introduced in the training documents library. Selecting an option from the dropdown menu will display all documents with that associated tag.

⭐ Improvements

- Regional users are hidden from the user management screen (Tools > Users) by default. A checkbox in the filter section has been added to allow viewing regional user accounts.
- Regional users have been removed from the MOD Schedule's AM/PM dropdown lists.
- The Timesheet has been modernized with updated controls, appearance, and layout.

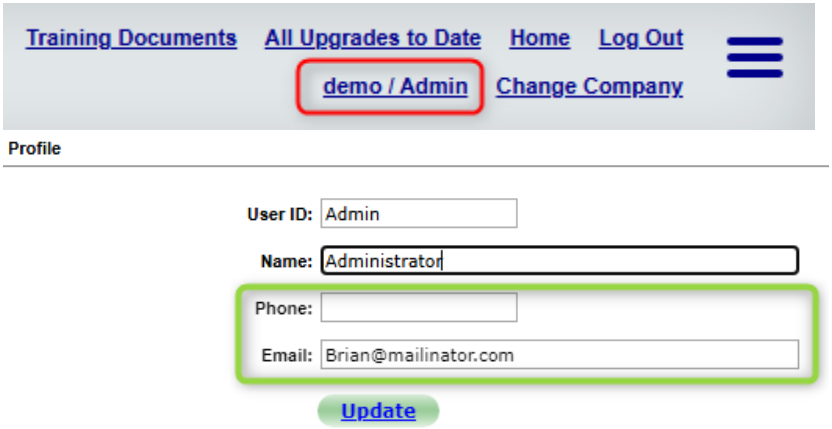

🔧 Bug Fixes

- Inactive certifications are no longer listed in the Certification dropdown list when new employee certifications are added.
- The “Trade Approved” schedule validation warning is no longer presented when shifts are swapped for the same day.

January 22, 2025

🚀 What's New

- A "Forgot Password" link is now available for users with a manager account. Users must have an email address or a mobile phone number linked to their account. Users can add this information through their User Preferences page or by a system administrator who manages user accounts.

- The options for managing employee service log points have been relocated to a new tab named “Service Log Point” within the “Company > Options” section.
- A new feature allows employees to receive notifications when they meet or exceed a point threshold. By default, this option is disabled; it can be enabled in “Company > Options > Service Log Point”.
- The PTO Cost column in the Daily Dashboard now reflects the calculation of hours multiplied by the employee’s rate or the Optim8 position rate, depending on how the system is configured for payment.

⭐ Improvements

- The Employee List and Schedule have been modernized with updated controls, appearance, and layout.

- The sign-in options have been revised to include Manager Sign In and Employee Portal Sign In.
- The Massachusetts meal break rule has been updated to provide a validation warning for employees working 6 hours or more who have not taken a 30-minute meal break.

🔩 Bug Fixes

- Accrual rules have been updated to automatically add approved paid time off for designated holidays, whether today or in the future.
- Ampersand signs are handled correctly in the service log tab of employee details and payroll rule names.
- Calendar Sync will ensure that shifts are published to the employee's default calendar when the shifts extend to or past midnight.
- Users will no longer be redirected to the Schedule by Employee page after adjusting shift dates, times, or locations in the Schedule date view.

January 2, 2025

🚀 What's New

Approved time off now appears on the schedule within the employee portal on both the web and mobile app.

⭐ Improvements

- The employee portal now displays a loading indicator when data is processed.
- In the “Schedule Change and Trade” section, the “All Schedules” option defaults to the current date, but users can still select a different date or range of dates.

🔩 Bug Fixes

- An issue has been resolved in both the web portal and mobile app that prevented users from viewing notifications when using brackets [ ] in the subject or body.
- Users will no longer be returned to Notifications or Schedules when swiping between apps.

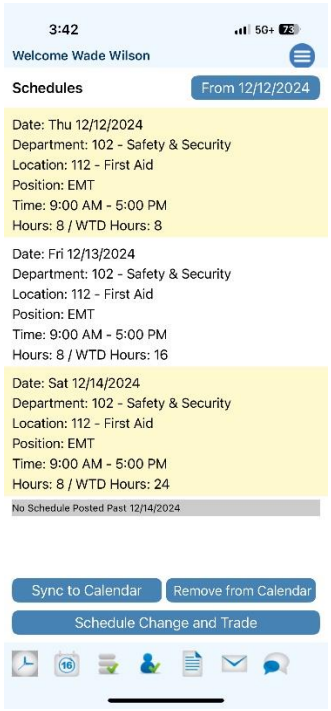

December 12, 2024

🚀 What's New

Team members can now sync their Optim8 schedules with the default calendar on their mobile devices. When prompted, they can allow full access or deny it. If they opt to allow access, the schedule module on their employee portal will feature a "Sync to Calendar" button and a "Remove from Calendar" button.

To keep their schedules updated—whether for new schedules or changes like updates to times, approved drops, trades, pickups, or covers—team members should click the "Sync to Calendar" button after receiving a notification about the changes. If a team member wishes to remove these events from their calendar, they can click the "Remove from Calendar" button.

The notes in their calendar will include additional information such as department, location, and position, if applicable.

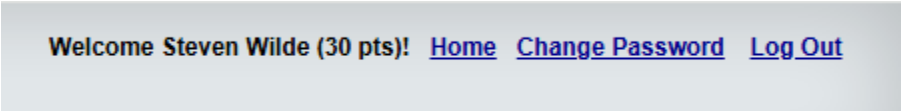

December 11, 2024

🚀 What's New

- A new “Update Time” option has been added to the schedule and template settings for all clients. This feature allows users to update start and end times in bulk.
- Clients now have the option to display the current total points of employee service logs on the web and mobile employee portal. By default, this option is turned off but can be enabled in the “Company > Options > System” section, labeled as “Show Current Service Log Points on Employee Portal.”

- An option has been added to track and validate meal and rest breaks in Indiana.

☆ Improvements

- The error warning message for employees attempting to trade shifts has been enhanced for better clarity. The message now reads: "Your shift trade with the selected employee cannot be processed because you do not qualify for the shift(s) you have to offer."

🔧 Bug Fixes

- Resolved an issue in the web portal and mobile app where an “&” contained in the text caused the text to display as “&#38”
- The mobile app now reflects the latest changes to the settings in Company > Options without requiring the employee to log out and back in.

November 13, 2024

🚀 What's New

- Added an option to track and validate meal and rest breaks in the state of Washington

☆ Improvements

- Shift trades are now permitted when the two parties' shifts overlap.
- Updated the employee feed for the UA Home Office to use the rate type instead of the pay frequency to determine which employees to import.

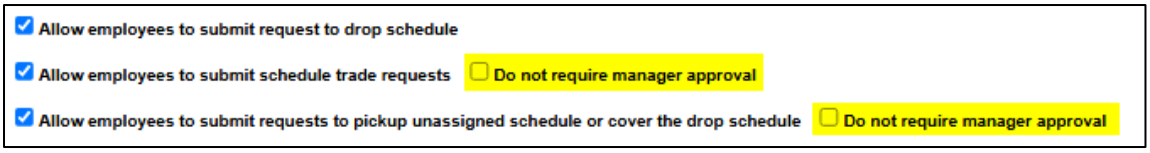

Bug Fixes

- Resolved an issue preventing users and employees from accessing the application.

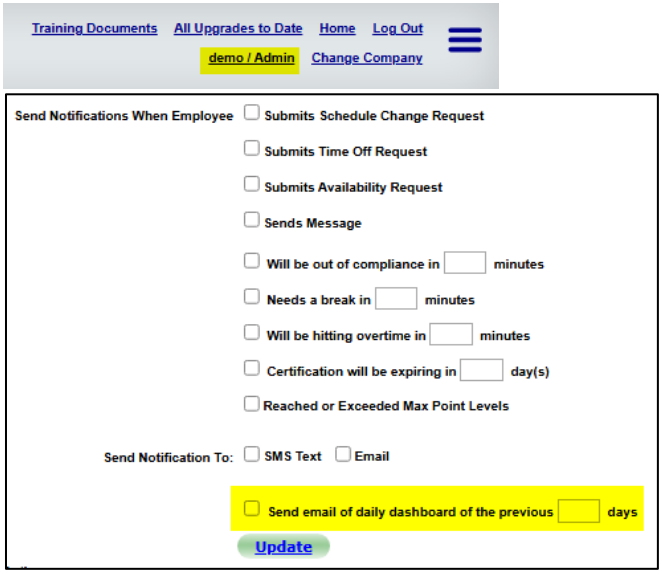

November 6, 2024

What's New

- A new "Tipped Average Wage" report has been added to the Payroll module. This downloadable file provides a detailed breakdown of hours worked, earnings, tips received, the average pay rate, and recommended adjustments if the average rate falls below the minimum wage for the specified period. To set the minimum wage for your location, go to the "Company > Options > System" page.
- A new feature on the "Company > Options > Schedule" page allows managers to enable shift trading, unassigned shift pickups, and drop request coverage without approval. This option is off by default.

- Managers with access to the Daily Dashboard report now have the option to receive a daily email containing data from the Daily Dashboard for a specified number of previous days. This email will be sent at 8:00 AM Central Time. To enable this feature, please visit the user preferences page.

Improvements

- Monitoring has been implemented to assist with integrating employee data from your HCM system.
    - Internal monitoring has been set up to alert the Optim8 team if the web service fails due to an expired certificate used by the HCM provider.
    - "ImportEmployee" is now available as an option in the "Activity Log" under the "Page" dropdown list. To view it, set the "User" filter to empty, select "ImportEmployee" from the "Page" dropdown, and click "Go." Any issues will be indicated in the "Note" column.
- Employee availability allows time entries past midnight in the "Can't Work Past" fields. If the "Can't Start Before" field is empty, the value in the "Can't Work Past" field will be assumed to refer to today. If the "Can't Start Before" field contains a value, the "Can't Work Past" field will be interpreted as referring to tomorrow.
- The alert in the company structure has been revised for clarity and conciseness.

Bug Fixes

- The sorting on the "Page" dropdown in the Activity Log has been fixed for all clients.

October 14, 2024

What's New

- When using the “Check In/Out” feature in the Manager Portal mobile app, the front-facing camera is the default if the “Take picture when employee checks in and checks out” option is enabled.
- MOD Schedule, shift hours, and week-to-date hours to be added to the mobile apps.

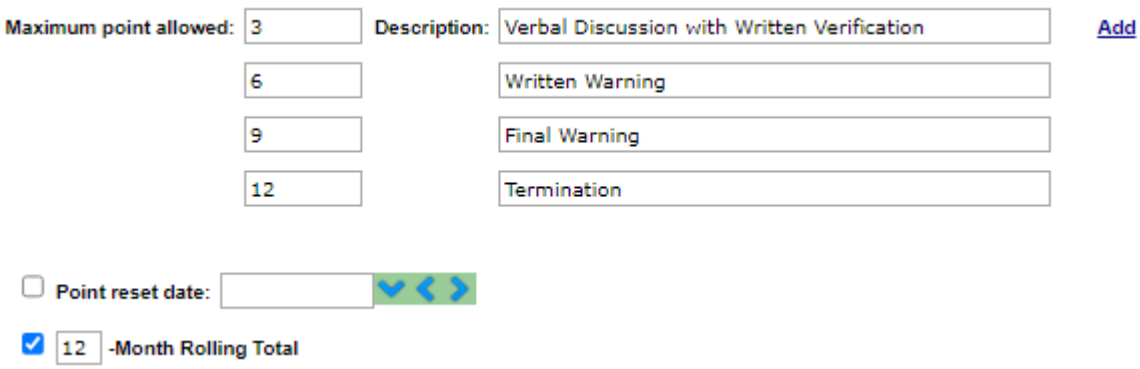

October 2, 2024

What's New

Service Log Point Thresholds and Notifications

- Maximum point thresholds can be configured by a point in time date or an x-month rolling total.
- Notifications can be configured based on one or more maximum point values
- A notification description can be assigned to each maximum point value
- In user account preferences, managers can receive text or email notifications when a threshold is hit. The notification will include the employee in question along with the configured description.

Managed in Company > Options > System

Team members can now see the MOD (Manager of the Day) Schedule in the employee web portal.

Team members can now see the hours per day and week-to-date hours in the employee web portal.

Training video updates include

- Availability Management
- Schedule Management
- Timesheet & Payroll

September 16, 2024

🚀 **What's New**

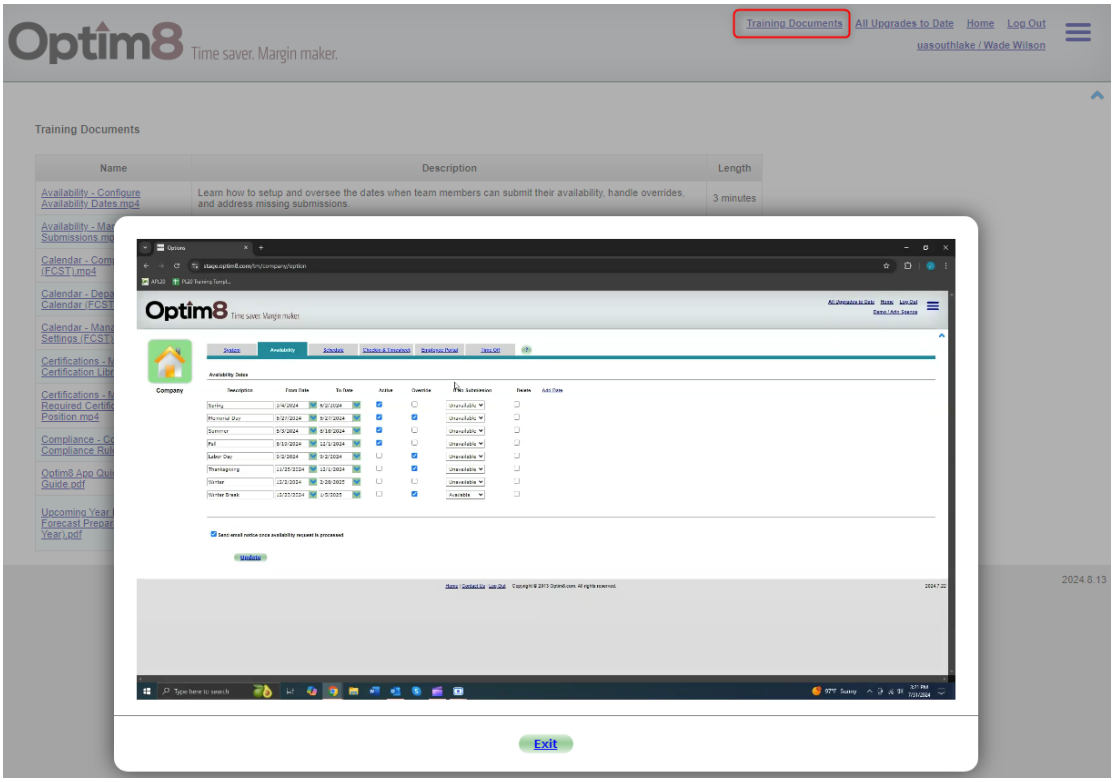

- Managers can now enable notifications when team members have submitted their availability.

August 21, 2024

🚀 **What's New**

Training Documents link

Admin users can access training documents and videos via the new “Training Documents” link. Clicking on a document launches the video or downloads a PDF.

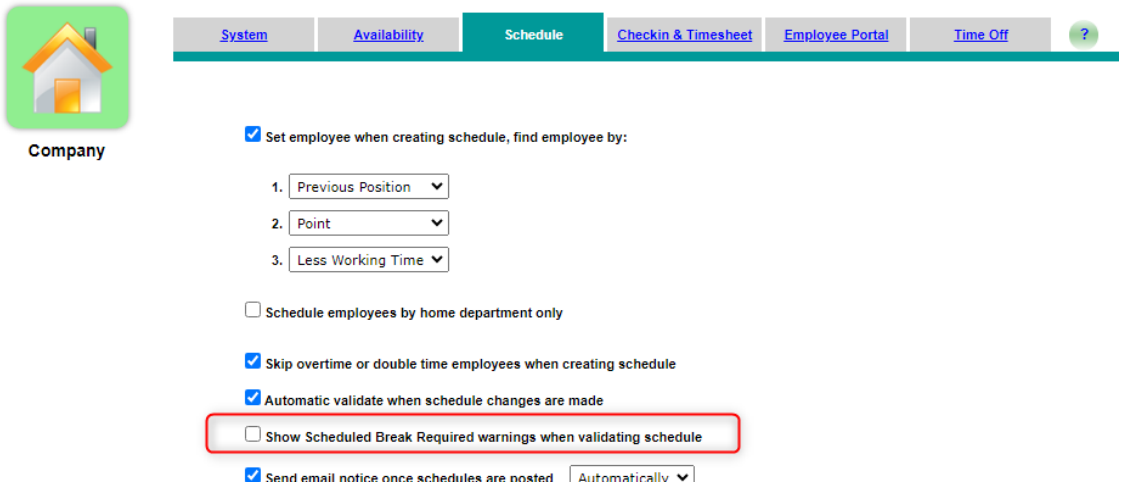

Note: Users may need a hard refresh if the link does not open the Training Documents (Ctrl+F5).

August 6, 2024

🚀 What's New

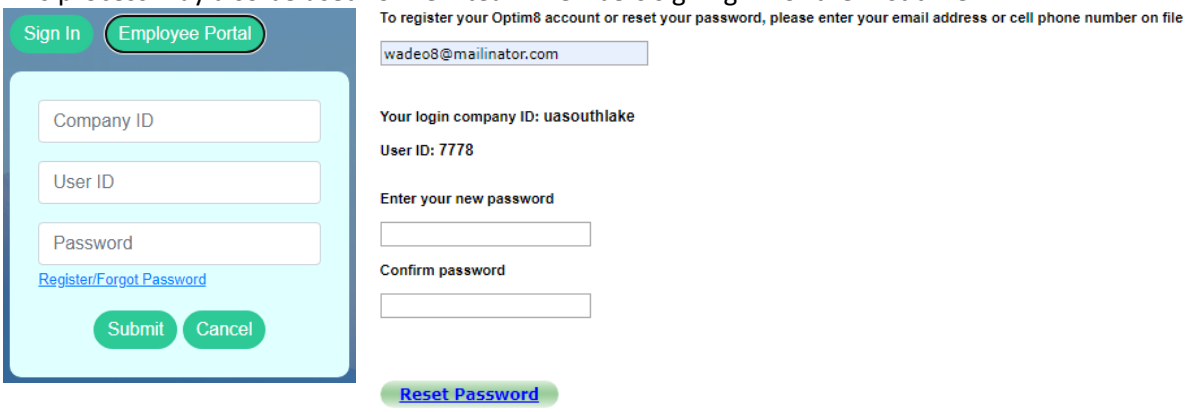

Option to turn off warnings on the schedule for "Break required before hh:mm".

Managers will continue to see warnings on the Timesheet and Break Compliance Monitor. This option is enabled by default.

Register / Reset Employee Portal Password

Team members can enter their email or mobile number to receive a validation PIN via email or text. After completing authentication, they can view their Company ID and User ID, and reset their password. This process may also be used for new team members signing in for the first time.

☆ Improvements

- The Availability Status report shows that the employee has not requested an override period when the availability dates are marked as unavailable. A filter lets users view rejected availability submissions, but the report won't display them by default.

Bug Fixes

- Updated to ensure that all worked time for a payroll rule is accurately included in the payroll export file for a team member who received a promotion tied to a different or blank payroll rule.

- When adding a new submission to an availability entry with a null end date, the end date will be automatically updated to one day less than the start of the new submission.

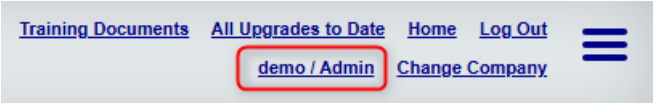

April 26, 2024

Improvements

- Employee count added to the schedule chart view
- The ability to filter by active employee only has been added to the Schedule by Employee module
- Timesheets contain a new filter for “any shifts longer than xx hours” or for “any shifts under xx hours”

Bug Fixes

- Adults now show on the break time monitor if the state law requires breaks, and the “Track and validate meal and rest break” is enabled with the applicable state selected. This setting is managed in Company > Options > Checkin & Timesheet.
- Update to ensure that notifications are delivered when a user has enabled “Need a break in xx minutes”. Notifications are managed in User Preferences / Notifications. Click the park name/user name link in the upper right corner.

- Update to ensure that Timesheet notes are accurately presented
